COMING SOON

GDPR

PREPARE NOW!
Welcome

• You were invited by A4ID to attend today’s event
• In order to register to the event, you registered with Eventbrite

What should have happened (if anything) between A4ID, Eventbrite and Mayer Brown?
Do you have any privacy expectations in that regard?
What is the impact of GDPR on NGOs daily activities?

<table>
<thead>
<tr>
<th>You reach out to people you know are potential supporters of your actions to raise funds</th>
<th>Participants who are not one of your members attends one of your events. You use their contact details to invite them to your next event</th>
</tr>
</thead>
<tbody>
<tr>
<td>During an event, you exchange your business card with one of the attendees. The next day, you use its contact details to inform him/her about your activities</td>
<td></td>
</tr>
</tbody>
</table>
Agenda

1. The New Privacy Framework
2. Legal Basis for Processing
3. New Data Governance Measures
4. Transfer of Personal Data
5. GDPR Compliance for NGOs
6. Q&A
The New EU Privacy Framework

• The GDPR introduces new rules for data processing activities:
  › **Directive vs. Regulation** - Introduction of a single set of rules applying to all Member States
  › **Updating EU privacy law** - GDPR introduces rules in line with new technologies
The New EU Privacy Framework

• The GDPR introduces new rules for data processing activities:
  › **New enforcement measures**: Fines up to the greater of 20 million Euros or 4% annual worldwide turnover
  › **Extraterritoriality principle**: GDPR will also apply to organisations based outside the EU if they target or monitor EU individuals

How will this affect your organisation?
### European Data Protection Directive 95/46 applies to:

- A data controller where it is established in an EU Member State and the data is processed in the context of that establishment

### General Data Protection Regulation 2016/679 applies to:

- The processing of personal data in the context of the activities of a data controller or data processor established in the EU, irrespective of where the processing takes place

- A data controller where it is not established in an EU Member State but is using equipment in an EU Member State for processing data otherwise than for the purposes of transit through that Member State

- The processing of personal data of data subjects who are in the EU by a data controller or data processor not established in the EU, where the processing activities are related to:
  - The offering of goods or services to those data subjects; or
  - The monitoring of their behaviour in the EU
EU Privacy Law: Key Concepts

**Personal data**
Any information relating to an identified or identifiable natural person

**Processing**
Any operation or set of operations performed on personal data or on sets of personal data

**Data controller**
Natural or legal person that determines the purposes and means of the processing of personal data

**Data processor**
Natural or legal person, that processes personal data on behalf of the controller
Data Protection Principles

8 core Data Protection principles

- Transparency
- Fairness
- Lawfulness
- Purpose limitation
- Security
- Integrity
- Quality
- Data minimisation
Need to rely on specific legal grounds to process Personal Data:

- Consent
- Contractual necessity
- Legitimate interest
- Vital interest
- Public interest
- Compliance with legal obligations

Are all of those new?

Can you identify which one is the most affected by GDPR?
Legal Basis for Processing: Consent

- Threshold for valid consent significantly increased
  - Consent must be freely given, **specific**, informed and unambiguous
  - Need for a **clear affirmative action**
  - It must be **recorded**
  - It must be unbundled (clearly distinguished from other matters)
  - Could be withdrawn “at any time”

**In which cases could you rely on consent?**

- If you rely on consent, when requiring individuals attending conferences or events to fill in a form and provide their data during the registration, provide a tick-the-box option or specific statement required to demonstrate acceptance of the proposed processing
Legal Basis for Processing: Necessary for the Performance of a Contract

• Controller must conduct a necessity test:
  › Controller cannot process information that is not necessary for the purposes of the contract
  › Need for a close and substantial connection between the data processing and the purposes of the contract

IN PRACTICE

Relevant if you need to process you employees’ personal data to provide them with the payment of their salaries
Legal Basis for Processing: Legitimate Interest

• Personal data may be processed if the controller has a legitimate interest in processing the data AND if the legitimate interest is not overridden by the rights or freedoms of data subjects

• The assessment is carried out on a case-by-case basis

Where else could you use this legal ground?

IN PRACTICE

Legitimate interest could include processing for direct marketing purposes. However always ask yourself:

What is the purpose of the processing and why is it important to you?

Is there another way of achieving the identified interest?

What are the rights and expectations of the data subjects?
Processing special categories of data

• **Sensitive data** = data on racial or ethnic origin, political opinions, religious or philosophical beliefs, sex life, sexual orientation, trade union membership, genetic data, health data, biometric data.

• They are granted a **higher level of protection**: need to rely on a specific legal ground (e.g., explicit consent for the data subject).
Example

You are processing sensitive data when:
The data subject provides information on allergies during the registration process of an event.
**Data Subject’s Rights**

- **Right to rectify**: data subjects have the right to ask for correction when data is inaccurate or incomplete.
- **Right to object**: individuals have the right to object to the processing, for example if based on legitimate interest.
- **Right to restrict the processing**: data subjects have the right to restrict the processing of their personal data in some specific circumstances.
- **Right of access**: data subjects can ask for confirmation that their data is being processed and to access the data.
- **Right to be forgotten**: a data subject has the power to ask the erasure of his/her personal data by the data systems (in specific circumstances).
- **Right to data portability**: data subjects may ask for personal data to be transferred directly from one controller/processor to another.
New Data Governance Obligations

- **Organisations are required to map their processing activities and undertake data protection impact assessments for higher risk processing.**

- **Businesses must now take a proactive approach to ensure that an appropriate standard of data protection is the default position taken.**

- **Organisations have to demonstrate that their processing activities comply with GDPR, meaning that controllers will need to keep detailed records of the processing activities they carry out.**

Which one do you think is the most relevant for you?
New Data Governance Obligations

Data Protection Officer

- Public authorities and organisations that carry out intrusive processing will have to formally appoint a Data Protection Officer

Data Breach Notification

- When a breach happens, the relevant European DPA must be notified without undue delay and, where feasible, within 72 hours. The individuals affected may also have to be notified
Data Protection impact assessment

• “A DPIA must be conducted with respect to activities that are likely to result in a high risk to the rights and freedoms of the individuals concerned, particularly when using new technologies.

• These include activities that involve:
  › Systematic, extensive evaluation of personal aspects of persons based on automated processing – i.e. profiling;
  › The processing of sensitive personal data, criminal convictions and offenses;
  › Systematic monitoring of publicly accessible areas on a large scale; or
  › Data transfers outside the EU; etc.
Data Protection impact assessment

- Description of the envisaged processing
- Monitoring and review
- Assessment of the necessity and proportionality
- Measures envisaged to demonstrate compliance
- Measures envisaged to address the risks
- Assessment of the risks to the rights and freedoms
- Documentation
• **Data breaches** = breach of security leading to the accidental or unlawful destruction, loss, alteration, unauthorized disclosure of, or access to, personal data transmitted, stored or otherwise processed

• Data processors must report personal data breached to data controller

• Data controller must maintain an internal breach register
Transfers of personal data outside the EEA are in principle excluded.

Transfers must be based on a legal transfer mechanism:

1. Adequacy decisions
2. Appropriate safeguards, including: Standard contractual Clauses (“SCCs”), Binding Corporate Rules (“BCRs”), etc.
3. If (1) and (2) are not available, transfers can be based on derogations, e.g., explicit consent, contractual necessity, etc.

If you rely on a service provider based outside the EEA in order to send invitations to events or newsletters, you must identify a specific legal transfer mechanism to transfer personal data.

But you are an EU-based association, why is this relevant?
Preparing for GDPR: A Practical Approach

KEEP CALM AND COMPLY WITH GDPR
### GDPR Compliance for EU Trade Associations

1. **Inform Your Leadership, Formulate a Plan**
2. **Map the Personal Data that Your Organisation is Processing**
3. **Decide Whether a Data Protection Officer Should be Appointed**
4. **Review the Grounds Under Which Personal Data is Being Processed**
5. **Draft or Review Information Notices**
6. **Update Your Data Governance Policies and Procedures**
7. **Review Your Contracts with Third Parties**
Step 1 : Inform Your Leadership, Formulate a Plan

- Make sure that decision makers and key people in your organisation are aware that the law is changing to the GDPR

  1. Provide a preliminary assessment of the application of the GDPR to your organisation
  2. Ask external advisors to brief your organisation at the next board meeting
  3. Draw up a high-level framework of the GDPR requirements that must be put into operation
Step 2: Map Your Personal Data

*What do I need to “map”?*

- Type of data and any classification
- Location of data
- Form of collection (or how it is obtained)
- Purposes of the collection and processing
- Details on storage (including where stored and who manages the system; whether there are back-ups)
- Encryption and destruction schedule
- Transfers and disclosures between business and third parties

*How do I “map” it?*

- Gather information
  - Make a plan
  - Identify and review relevant policies
  - Involve key actors (HR, Communication, IT, etc.)
  - Ensure mapping is ongoing
- Make it visual (i.e., a *map*)
- Identify any gaps
## EU Trade Associations Data Mapping Exercise

</tr>
</tbody>
</table>
Step 3: Appoint a Data Protection Officer?

• Decide whether it is required under the GDPR to appoint a data protection officer
• Or your funding partners will decide for you...
Step 3: Appoint a Data Protection Officer?

Responsibilities of a DPO

• Monitor compliance with GDPR
• Assist with the production of DPIAs
• Pay particular attention to high risk processing
• Available for data subject concerns
• Cooperate with DPAs

Rights of a DPO

• Sufficient funding and access to perform the role
• Certain degree of autonomy
• Protected under the GDPR from unfair dismissal/termination in some cases
• Business must involve the DPO from the outset in all related issues
Step 4: Review the Grounds for Processing

• On the basis of the information gathered during the data mapping exercise, review the legal grounds on which you rely on in order to process personal data

• Consider:
  › The purposes of processing (if you collect personal data for one purpose, you cannot use it for another incompatible purpose)
  › The context in which you collected the personal data – in particular, your relationship with the individuals and what they would reasonably expect
  › The nature of the personal data
  › The possible consequences for individuals of the new processing; and
  › Whether there are appropriate safeguards in place
Step 4: Review the Grounds for Processing

- **Do you always need consent?**
  - Representatives of member companies
    - When you process data of your members, you could rely on legitimate interest, **but a STRICT TEST APPLIES!**
    - When you process other data subject data, consider other legal basis (e.g., consent)
  - Individuals attending your organisation’s conferences and events
    - When you follow up to people attending your events, you could rely on the legitimate interest ground, **but a STRICT TEST APPLIES!**
    - If you would like to invite them to other events, you should ask their consent!
Step 4: Review the Grounds for Processing

- **What happens to your old database?**
  - You would like to contact all the individuals already included in your database to ask their consent on whether they would like to receive your newsletter going forward
  - **Honda Motor Europe fined £13,000**
    - Honda sent an email to 289,790 contacts asking “Would you like to hear from Honda?”
    - Honda was trying to comply with GDPR: the email was sent in order to clarify how many of the subscribers would like to receive marketing emails going forward.

- **Key take-away:** Even asking for consent is classified as marketing and is in breach of the upcoming GDPR!
Step 5: Draft or Review Your Information Notices

- Transparency of processing requires controller to provide information notices
- Notice must be provided at the time data is obtained (POC) and must include:

  - Identity and contact details of the controller
  - Details of representative and DPO (if any)
  - Purpose and legal basis of processing
  - Data storage period
  - Details of data transfers outside EEA and safeguards
  - Recipients
  - Use of automated decision making or profiling
  - Details of legitimate interests
  - Rights of access and correction
  - Right to withdraw consent
  - Right of complain to DPA
  - Right of object to data processing
  - Right of data portability
Step 6: Update Your Data Governance Policies and Procedures

Policies and procedures should be updated to detail how your organisation will practically comply with the new requirements.

- Data breach notification Policy
- Retention and destruction policies
- IT security policies
- Data processing register
- Procedures to respond to data subjects’ requests
Step 7: Review Your Contract with Third Parties

- Controllers must use a high degree of care in selecting processors.
- Contracts must be implemented that contain a range of information—e.g., data processed and duration, obligations such as data breach reporting, use of technical measures, audit assistance obligations, etc.
- Data transfer restrictions apply to controllers and processors. Controllers should review whether any of the third parties they share personal data with is located outside the EEA and ensure they have a legal transfer mechanism in place.

IN PRACTICE

Most associations rely on external companies providing newsletter services.

Look at their Terms and Conditions and consider whether signing a Data Processing Agreement is necessary: if something goes wrong, you will be liable under GDPR.
